

## Claims

1. A motor vehicle door (1) with a windowpane (2) movable therein as well as at least one window-lifting rail (3) for guiding the windowpane, wherein a module support (5) is attached in the interior (4) of the motor vehicle door, for accommodation of elements such as load speakers (6) or likewise, characterised in that the module support (5) and/or the window-lifting rail (3) comprise at least one receiver (17) for the positive-fit retention of the window-lifting rail in the module support.
2. A motor vehicle door according to claim 1, characterised in that an additional screwing for the fixation of the window-lifting rail (3) on the module support (5) is given.
3. A motor vehicle door according to one of the preceding claims, characterised in that the window-lifting rail (3) and/or the module support (5) comprise pins (7, 8) for the mutual centring and for the support of the window-lifting rail (3).
4. A motor vehicle door according to claim 3, characterised in that in each case two pins (7, 9) are provided for a window-lifting rail (3) (Fig. 3a).
5. A motor vehicle door according to one of the preceding claims, characterised in that one or two window-lifting rails (3) per door are provided.
6. A motor vehicle door according to one of the preceding claims, characterised in that the window-lifting rail (3) is of metal.
7. A motor vehicle door according to one of the preceding claims, characterised in that the module support (5) is of plastic.
8. A motor vehicle door according to one of the preceding claims, characterised in that the door (1) comprises a base structure (15) of deep-drawn profiles, wherein an outer skin (10) to the door closure to the outside is given, and at least one door inner panel (11) is provided closer towards the motor vehicle interior, for fixing the module support.

9. A motor vehicle door according to one of the claims 1 to 7, characterised in that the door comprises a frame which at its side which is distant to the motor vehicle interior as well as its side which faces the motor vehicle interior in each case comprises a panelling.
